### ITALIANO

- Questo catalogo è stato realizzato per consentire la ricerca e l'ordinazione delle parti di ricambio, e per verificare la posizione di montaggio delle parti di ricambio a magazzino.
- Il catalogo è così composto: da pagina 4 a pagina 10 vi sono le istruzioni di consultazione e di ordinazione delle parti di ricambio (impaginate in senso verticale); da pagina 11 in poi vi sono le vere e proprie pagine di consultazione del catalogo (impaginate in senso orizzontale).
- Ogni macchina è suddivisa in gruppi funzionali, come illustrato a pagina 11, e ciascun gruppo può essere composto da una o più tavole in funzione della sua complessità.
- L'indice dei gruppi funzionali è la **chiave di ricerca principale** attraverso la quale si giunge alla tavola ricambi desiderata e, successivamente, alla parte desiderata.

**N.B. Le tavole ricambi sono presentate in ordine di codice progressivo** (dal più basso al più alto): un utilizzatore esperto può consultare le tavole senza dover passare ogni volta dall'indice dei gruppi funzionali.

- Una **chiave di ricerca secondaria** è rappresentata dall'indice sommarizzato delle parti di ricambio, attraverso il quale è possibile fare il percorso inverso: dato cioè il codice del ricambio si può determinare la denominazione, in quali tavole è presente, in che quantità e in quale posizione è richiamato nell'illustrazione.
- L'indice delle tavole serve invece per avere un prospetto rapido di tutte le tavole ricambi presenti secondo l'ordine di impaginazione.
- Per ulteriori chiarimenti contattare il Servizio Assistenza Tecnica TEREXLIFT.

### ENGLISH

- This catalogue has been designed to help you identify, locate and order replacement parts and to check the assembly position of the spare parts in stock.
- The catalogue is arranged as follows: pages 4 to 10 contain instructions on how to use the catalogue and order spare parts (vertical layout); the main body of the catalogue begins on page 11 (horizontal layout) and includes the various search indexes and the spare parts illustrations themselves.
- Each machine is divided into several functional groups or assemblies, as shown on page 11, and each functional group is in turn composed of one or more spare parts illustrations, depending on its complexity.
- The index of functional groups or assemblies is therefore **the main search key** you should use to locate the illustration you want and the specific part you require.

**N.B. The illustrations are presented in numerical sequence by their code number** (from the lowest to the highest): an expert user can therefore consult them without having to go via the index of functional groups.

- **A secondary search key** is the summary index of spare parts which can be used to perform the process in reverse: i.e. given the spare part number you can identify the name of the part, the illustration in which it is shown, its quantity and its position number in the illustration.
- The index of illustrations is intended as a quick overview of all the illustrations included in the catalogue, in the order in which they appear.
- For more information, please contact the TEREXLIFT Customer Service.

### FRANÇAIS

- Ce catalogue a été réalisé pour permettre la recherche et la commande de pièces de rechange et pour vérifier la position de montage des pièces de rechange en stock.
- Le catalogue est composé de la façon suivante: de la page 4 à la page 10, il contient les instructions pour la consultation et la commande des pièces de rechange (disposées dans le sens vertical); la page 11 et les pages suivantes constituent les pages de consultation à proprement parler (disposées dans le sens horizontal), elles contiennent les index de recherche et les tableaux des pièces de rechange.
- Chaque machine est subdivisée en plusieurs groupes fonctionnels comme l'illustre la page 11 et chaque groupe fonctionnel est composé à son tour d'un ou de plusieurs tableaux de pièces de rechange, selon sa complexité.
- L'index des groupes fonctionnels est donc la **clé de recherche principale** à travers laquelle on arrive au tableau désiré puis à la pièce de rechange proprement dite.

**N.B. Les tableaux de pièces de rechange sont présentés en ordre de code progressif** (du plus petit au plus grand): un utilisateur expert peut ainsi les consulter sans devoir passer par l'index des groupes fonctionnels.

- Une **clé de recherche secondaire** est représentée par l'index sommaire des pièces de rechange à travers lequel on peut effectuer le parcours inverse: connaissant le code de la pièce, on peut arriver à sa désignation exacte, au numéro du tableau où elle se trouve, à la quantité et au numéro de position de la pièce sur l'illustration.
- L'index des tableaux sert enfin à avoir une vision rapide de tous les tableaux de pièces de rechange présents, dans l'ordre de mise en page.
- Pour toute précision, contacter le Service Après Vente TEREXLIFT.

**DEUTSCH**

- Dieser Katalog wurde erstellt, um Ihnen bei der Auffindung und Bestellung von Ersatzteilen zu helfen und um die MontagePosition der lagernden Ersatzteile prüfen zu können.
- Der Katalog ist folgendermaßen aufgebaut: von Seite 4 bis Seite 10 sind die Anweisungen darüber enthalten, wie der Katalog verwendet wird und wie Ersatzteile bestellt werden (vertikales Layout); ab Seite 11 beginnt der eigentliche Katalog (horizontales Layout), darin finden Sie die Verzeichnisse zur Auffindung der Ersatzteile und die Ersatzteil-Übersichten.
- Jede Maschine ist in mehrere Funktionsgruppen unterteilt - wie auf Seite 11 dargestellt wird - und je nach Größe besteht jede Funktionsgruppe wiederum aus einer oder mehreren Ersatzteil-Übersichten.
- Das Verzeichnis der Funktionsgruppen ist der **Hauptschlüssel zur Auffindung** des Ersatzteils. Über dieses Verzeichnis kommt man zur gewünschten Ersatzteil-Übersicht und anschließend zum erforderlichen Ersatzteil.

**N.B. Die Ersatzteil-Übersichten sind fortlaufend numeriert** (von der untersten zur obersten): Ein geschickter Benutzer geht direkt auf diese Übersichten über, ohne jedesmal im Verzeichnis der Funktionsgruppen nachzuschlagen.

- Die Ersatzteil-Zusammenfassung stellt die **zweite Nachschlagehilfe** dar. Über die Zusammenfassung ist es möglich, in umgekehrter Reihenfolge vorzugehen: d.h. über den angeführten Ersatzteil-Code kann der Name des Ersatzteils, die Übersicht auf der er abgebildet ist, wie oft er vorkommt und seine Positions-Nummer auf der Übersicht festgestellt werden.
- Mit dem Übersichts-Verzeichnis hat man einen schnellen Überblick auf alle vorhandenen Ersatzteil-Übersichten, in der Reihenfolge in der sie angeführt sind.
- Für weitere Informationen wenden Sie sich bitte an den TEREXLIFT-Kundendienst.

**ESPAÑOL**

- Este catálogo ha sido realizado para permitir la búsqueda y la petición de las partes de recambio, y para verificar la posición de montaje de las partes de recambio del almacén.
- El catálogo está compuesto como a continuación: de la página 4 a la página 10 están las instrucciones de consulta y pedidos de las partes de recambio (impresas en sentido vertical); a partir de la página 11, están las verdadera y propiamente dichas páginas de consulta del catálogo (impresas en sentido horizontal), y que comprenden los índices de búsqueda y las tablas de recambios verdadera y propiamente dichas.
- Cada máquina está subdividida en más de un grupo funcional, como se ilustra en la página 11, y cada grupo funcional está, a su vez, compuesto por una o más tablas de recambios según su complejidad.
- El índice de los grupos funcionales es por lo tanto **la clave de búsqueda principal** a través de la cual se llega a la tabla recambios deseada y sucesivamente a la parte de recambio.

**N.B. Las tablas de recambios se presentan en orden de código progresivo** (del más bajo al más alto): un usuario experto puede, de este modo, consultar sin tener que pasar cada vez por el índice de los grupos funcionales.

- Una **clave de búsqueda secundaria** la representa el índice resumido de las partes de recambio, a través del cual es posible hacer el recorrido contrario: es decir, dado el código del recambio se puede determinar la denominación del recambio, en qué tabla recambios está, en qué cantidad y en qué número de posición está representado en la ilustración.
- El índice de las tablas sirve, al contrario, para tener una perspectiva rápida de todas las tablas de recambios presentes, según el orden de la página.
